

AgCl

Silver Chloride

Dimensions: Rolled Coil or Sheet

Rolled Thickness: ".0005- 0.080"

Slit Widths: ".0.500 -9.00"

Density: 2.93 g/cm³

Specific Gravity: 5.50+/- .02

Chemical Composition

Ag 75.26% Nominal

Impurities: 0.1% Maximum

Appearance:

Translucent, White to Silver in Color

Photosensitive, Reactive to White Light

Common Use:

Used as Cathode Material in Seawater Activated Batteries

Note: Can also be supplied in powder/chunk form.
